

# Noodle Tools and Research – CPP Guide

## How to create notecards

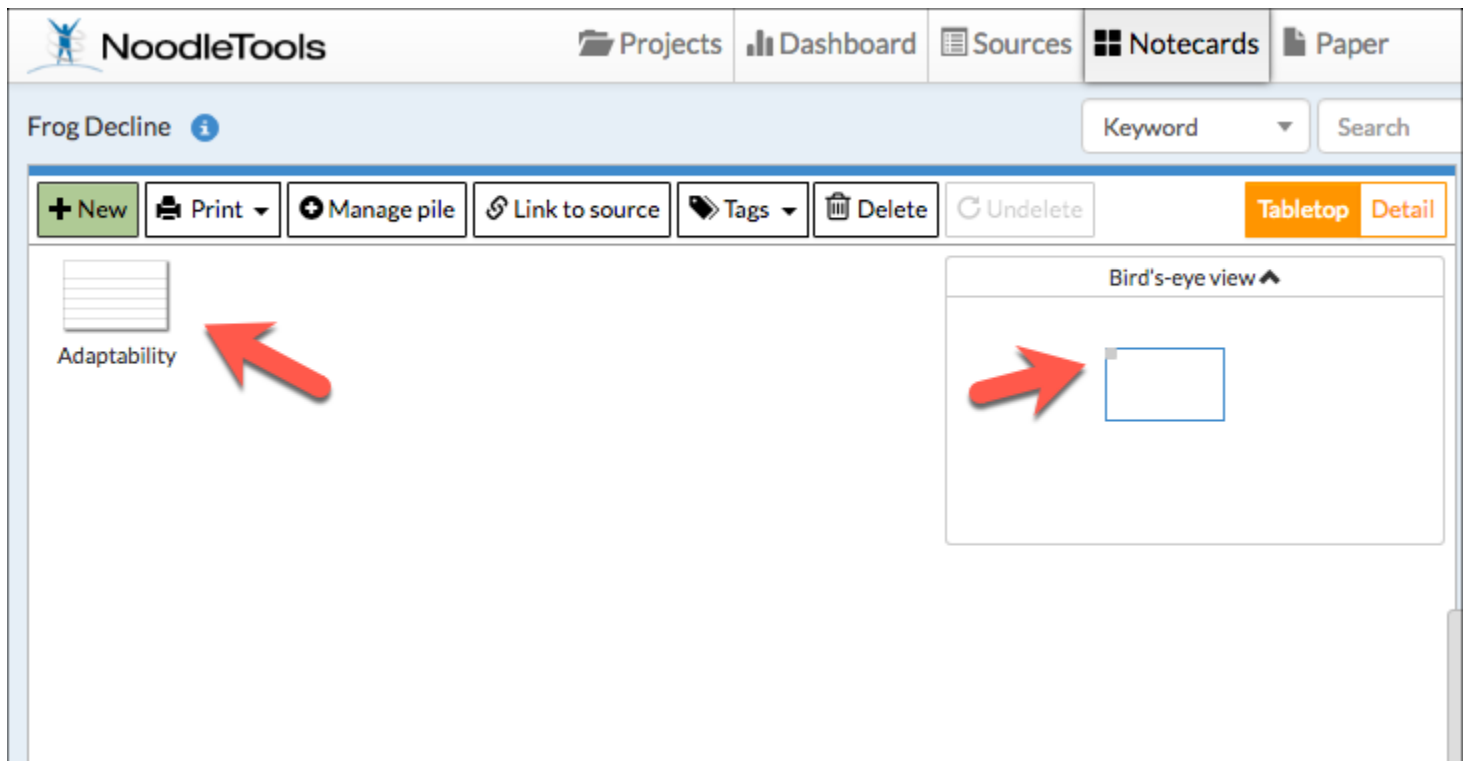

1. Make sure you are **inside** a project. Click **Notecards** in the navigation bar at top.
2. On the Notecard Tabletop, click **New**.

3. Input notes about your source.

4. Your notecard gets saved automatically as you add information. When you are done, click **Save and Close** to save your final changes and close the window. New notecards appear in the upper left corner of your tabletop and in the **bird's eye view**.

TIP: Once you've created multiple notecards, you can pile them. Drag a notecard and drop it on another notecard to create a new pile, or use the **Manage pile** option above the tabletop to manage existing and create new piles with selected notecards. Notecard piles become the basis of organization within the Outline panel next to the Notecard Tabletop.
